

TAPES

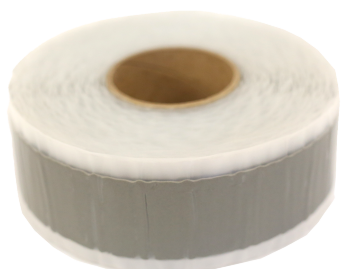

Alford Adhesive Tapes

Squid Tape™

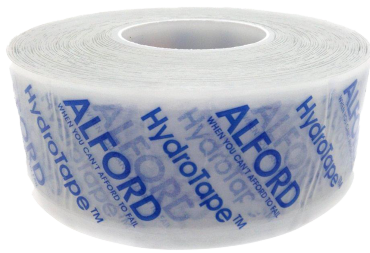

Squid Tape™ is a silicone-based, non-sticky, non-adhesive, self-amalgamating tape that can be used on land and underwater. It is highly stretchy and forms a water-tight seal around objects, ensuring their secure affixation to a target. Squid Tape has been engineered to adhere only to itself, guaranteeing reliable handling, even in adverse conditions like cold weather, wearing gloves, or underwater.

Breacher's Tape™

Breacher's Tape™ is one of the best-known and respected brands of adhesive specifically created for breachers. Successfully tested during adverse weather conditions, it is a high-performance adhesive designed to stick charges to wood, metal, glass, and certain wall targets. See also HydroTape™, which is particularly good for dirty conditions and allows the operator to reposition the charge numerous times while retaining its adhesive properties.

Developed in collaboration with the producers of Hydrogel, HydroTape has been tested extensively against its competitors and has demonstrated superior adhesive properties. It's easier to use, especially when wearing gloves, due to the woven core and release liner, which aids application. It is the best adhesive for sticking charges to dirty and damp/wet surfaces, with a central layer of woven fabric, which gives the tape strength and form and prevents stretch. It's also ideal for when you need to reposition a charge, as it allows you to do this multiple times. HydroTape is available in two widths: 50mm and 100mm.

	Squid Tape	Breacher's Tape	HydroTape	
			Standard	Wide
Dimensions	38.1mm x 10.8m	50mm x 15m	50mm x 15m	100mm x 9m
Backing tape	N/A	N/A	70mm wide	120mm wide
Thickness	0.6mm	1.52mm	1.25mm	1.25mm
